About Us

Accurate Industries was established in February 2022 by Matthew Keane (Managing Director), Peter Leeming (Projects Director) and Brad Leeming (Service Director) to deliver high-quality service and support for material flow system performance in the mining industry.

Since then, we have grown rapidly to become a trusted service provider to some of the sector's largest and most recognised operators, delivering expertise, service and products from multiple locations to cover the entire country.

We are committed to delivering reliable field service, calibration, testing and system performance improvement for our customers. Our technicians have deep product and service expertise across all major OEM equipment for belt weighers, weigh feeders, tramp metal detectors, magnetic separators and belt radar systems.

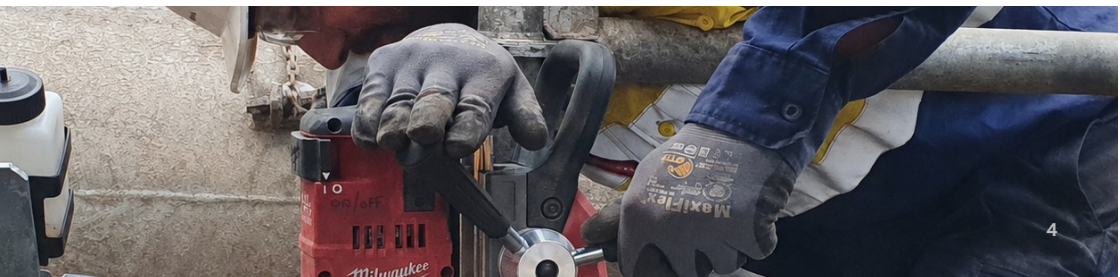

We work closely with customers to keep plant and equipment accurate, reliable and well maintained, giving site stakeholders the data they need for expert plant balance, product purity and yield outcomes.

The same technicians and service standards now extend to food and beverage production and to transport and logistics, where we supply, install and maintain inspection and in-motion weighing systems.

Why Accurate Industries

Compliant, licensed and ready for site

-  **NMI LICENSED**
All field technicians are registered and licensed with the National Measurement Institute of Australia for trade-approved verification work, with traceable calibration and verification.
-  **MINE-SITE COMPLIANT**
Technicians are trade qualified and hold current Coal Board Medical and Standard 11 certificates. All vehicles are mine- and quarry-compliant and stocked with full PPE, so there's no delay getting our people on your site.
-  **100% AUSTRALIAN OWNED AND OPERATED**
Founded and led by people with real field experience. Our directors have a combined 50+ years of hands-on weighing and measurement expertise. When you call, you're talking to people who have done the work themselves.
-  **AUSTRALIAN DESIGNED AND BUILT**
Custom weighometers and parts designed and built to suit your site.
-  **ANY BRAND, ANY AGE, ANYWHERE**
We take a brand-agnostic approach. Whether your plant runs equipment from one manufacturer or a mix of many, our technicians have the hands-on experience to service, calibrate and repair it. One point of contact for your entire weighing and measurement system.

Our Team

Accurate Industries brings together more than 100 years of collective experience in the specification, supply, installation, commissioning and ongoing maintenance of weighing and measuring instruments.

We are proud to be owned and led by people with real, hands-on “on the tools” experience.

Vision & Mission

Vision

To set the standard for efficiency, accuracy, integrity and performance in material flow systems across all industries.

Mission

To be trusted advisors and partners to industry by providing the best products, services and expertise.

What We Believe In

- Developing strong relationships with our customers to deliver best-in-class outcomes.
- Providing accurate, reliable and honest service and information to our customers.
- Specifying and supplying the right equipment for every application, every time.

Our Core Values

START guides how we work — **S**afety · **T**rust · **A**ccurate · **R**espect · **T**eam

SAFETY

We work safely and leave safely every day whilst taking responsibility for the safety of others.

TRUST

We act with credibility, professionalism and integrity in all that we do.

ACCURATE

It is in our name and our DNA. We believe in accurate communications, accurate equipment, accurate advice and accurate outcomes for all.

RESPECT

We recognise each other's differences and show consideration for one another and the environment we live in.

TEAM

We combine individual strengths to develop exceptional results.

Our Services

End-to-end support for material flow systems

From equipment selection and installation through to calibration, maintenance and performance improvement, Accurate Industries provides practical, reliable support to keep critical plant accurate, efficient and operating at its best.

Consultation & Design

Practical advice and tailored solutions to meet your application and performance requirements.

Installation & Commissioning

Professional installation and commissioning to ensure equipment is correctly integrated and ready to perform.

Calibration & Testing

Accurate calibration and testing to ensure reliable measurement and system performance, including trade-approved verification for approved belt weighers.

System & Spare Parts Supply

Quality equipment, components and replacement parts from leading OEM brands.

Remote Support

Responsive technical support to help diagnose issues and minimise downtime.

Quality Reporting

Clear and accurate reporting to provide confidence in equipment performance and service outcomes.

Repairs, Service & Maintenance

Planned maintenance, repairs and breakdown support to keep equipment operating reliably.

Recommendations & System Improvements

Expert recommendations to improve accuracy, efficiency, reliability and overall system performance.

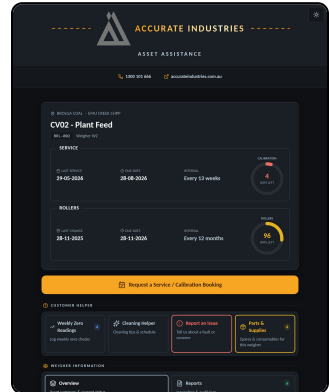

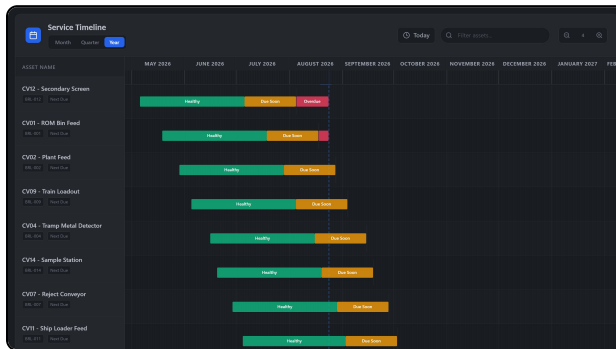

AIMM Asset Management

Included with your service.

A permanent record of every asset we maintain

AIMM — the Accurate Industries Maintenance Manager — is our own maintenance management system. Every asset we maintain has an ongoing record: equipment details, configuration, calibration and service history, previous findings, reports and upcoming requirements, all in one place.

RECORDED

Every asset, every visit, kept for good. Completed calibration and service reports are stored against the equipment they relate to.

PLANNED

Every weigher, weigh feeder and detector is tracked against its service and calibration schedule. We coordinate upcoming work with your planners around site requirements and shutdowns.

VISIBLE

Customers on our service program have access to a secure page showing their equipment, upcoming requirements, previous work and completed reports.

PROBLEMS FOUND EARLY

A result can be within tolerance and still tell us something when compared with previous visits. Keeping history together lets us spot trends early.

There's no software to buy or system for your team to maintain. It's simply part of the service we provide.

Industries We Serve

Accurate Industries is the go-to Australian partner for the improved performance and efficiency of material flow systems for mining and quarrying, with a core focus on processing plants for mines and quarries, ports and power stations. We also serve a growing range of other industries.

MINING

Processing plant balance and efficiency, upstream asset protection, yield optimisation and load-out accuracy.

QUARRYING

Processing plant balance and efficiency, upstream asset protection, yield optimisation and production accuracy.

RECYCLING

Belt weighers, weigh feeders, magnetic separators, tramp metal detectors, service and calibration.

GRAIN & MILLING

Belt weighers, weigh feeders, magnetic separators, service and calibration.

FREIGHT & LOGISTICS

In-motion scales, labelling systems, belt weighers, service and calibration.

FERTILISER & CHEMICAL

Weigh feeders, magnetic separators, service and calibration.

FOOD & BEVERAGE

Inspection systems, weigh feeders, magnetic separators, service and calibration.

ANIMAL FEED

Weigh feeders, magnetic separators, service and calibration.

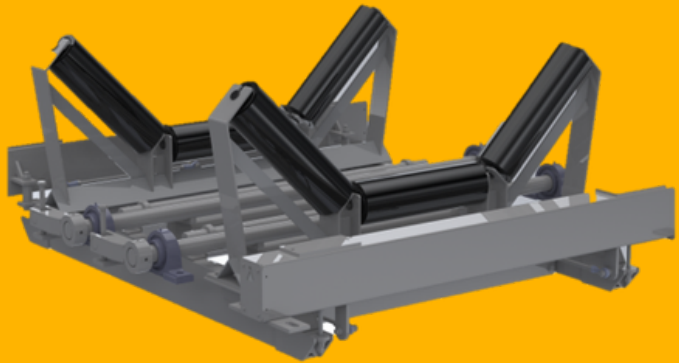

Our Products

Accurate Industries offers a full range of equipment for the protection of plant assets (magnetic separators and tramp metal detectors), the measurement and optimisation of material flow systems (belt weighers, weigh feeders, train load-out systems and belt radar), and inspection and weighing systems for food and beverage and logistics — all to improve performance, balance, purity and yield.

BELT WEIGHERS

Gain control and system balance

PRECISE

The highest possible accuracy for the conditions.

ROBUST

Made for the environment, our belt weighers are built to last.

FLEXIBLE

Single and multi-idler designs to suit all needs and conveyor types.

WEIGH FEEDERS

Dictate flow rates
Precisely dose and blend

- **PRECISE**
Feed specific amounts or rates at high accuracy.
- **EFFICIENT**
Minimise product giveaway with precise control.
- **FLEXIBLE**
Flexible designs to meet a variety of applications, from wash plants to specialist dosing systems.

MAGNETIC SEPARATORS

The front line for tramp metal removal

- **PROTECT**
Safeguard important upstream assets.
- **QUALITY**
Improve product purity.
- **EFFICIENT**
Never stop the material flow.

Range: overhead permanent magnets and electromagnets, self-cleaning units and magnetic head pulleys.

TRAMP METAL DETECTORS

The true "last line" of defence for critical assets that simply demand protection

PROTECT

Safeguard important upstream assets.

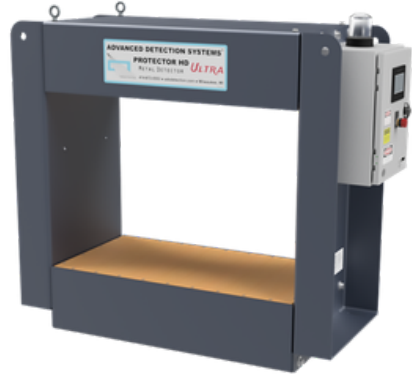

DE-RISK

Avoid unnecessary downtime.

CONFIDENCE

The ultimate backup system.

RADAR SYSTEMS

Reliable, non-contact monitoring in tough conditions for bulk material flow

BULK FLOW

Volume flow, belt speed, alignment and freeboard on conveyors; level and blockage detection at chutes, crushers, screens and ore passes.

BULK VOLUME

Live 3D level and inventory for silos, domes, bunkers and stockpiles.

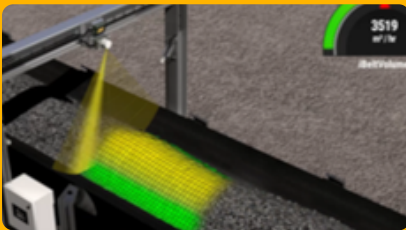

STOCKYARD & LOAD-OUT

Inventory control, positioning and collision avoidance for stackers and reclaimers; radar-assisted train and ship loading.

SAFETY & POSITIONING

Vehicle and machine collision avoidance and positioning across site.

A full site suite of industrial radar solutions, from pit to port, that measure reliably through dust, water spray, fog and low visibility, with no scheduled calibration.

TRAIN LOAD-OUT SYSTEMS

Weight-controlled train loading

-  **ACCURATE**
Multiple weigh options to meet all accuracy requirements.
-  **CONTROL**
Control of filling valves, gates and conveyors.
-  **DATA**
Load-out totals, system reports and more.

We resolve under-loading, over-loading and weighing discrepancies.

ALSO AVAILABLE

-  **Load cells**
Replacement and upgrade load cells for any make of belt weigher.
-  **Weigh-quality rollers and idlers**
Precision idlers to bring weigh frames back to specification.
-  **Integrators**
EMC ModWeigh MP1 and MP2, and Schenck Process INTECONT Tersus.
Accurate Industries is the authorised Australian distributor for EMC ModWeigh and Schenck Process weighing electronics, and provides compatible options for obsolete or unsupported hardware.

FOOD & BEVERAGE INSPECTION SYSTEMS

Industry-leading Bizerba inspection technology, all from a single agent

Accurate Industries supplies Bizerba food and beverage inspection systems across Australia. We help select equipment for your product, packaging and production line, with local installation, commissioning, operator training and ongoing support.

CHECKWEIGHERS

Check pack weights and reduce giveaway. Up to 600 packs per minute depending on product weight and size, precision to 0.2 g, hygienic IP65 stainless design.

X-RAY INSPECTION

Detect metal, glass, stone, bone and dense plastics, even inside packaged product, and verify completeness and fill.

METAL DETECTION

Detect ferrous, non-ferrous and stainless steel contaminants in packaged or unpackaged product.

VISION & LABEL INSPECTION

LabelSecure checks label position, printed data, allergens and packaging against reference criteria, with automatic rejection and reporting.

Local expertise, global technology. Bizerba inspection systems with Australia-wide installation, commissioning, calibration and support from Accurate Industries.

TRANSPORT & LOGISTICS SYSTEMS

Bizerba in-motion scales and print-and-apply labelling for warehousing, distribution and parcel shipping lines

IN-MOTION SCALES

Dynamic, verifiable checkweighing and catchweighing at conveyor speed for sorting, infeed and parcel shipping lines.

CWL-L — up to 60 kg at up to 3.1 m/s. **CWL-I** — up to 1.0 m/s, IP65, with a stainless steel option.

PRINT-AND-APPLY LABELLING

GLM-Bmaxx 120 and **GLM-Bmaxx 150/350/700**. Automatic labelling of cartons, cases and pallets from the front, side or top, integrated with your conveyor.

INTEGRATED DATA

Combine scales, labellers and scanners for complete weight, volume and ID data, with integration into your existing data system.

Our Technology Partners

We work with leading global manufacturers and specialist suppliers to deliver trusted weighing, inspection and measurement solutions.

BIZERBA

OTHER BRANDS WE SERVICE

- We hold spares in QLD to support the below OEM equipment and more.
- We provide compatible options for all existing installs when repairs or upgrades are required for obsolete or unsupported hardware.

Our Coverage

NATIONAL COVERAGE

Headquartered in Brisbane, with branches in Rockhampton, Sydney and Melbourne, our technicians are strategically located across QLD, NSW and VIC. Customers in the Northern Territory, South Australia and Tasmania are looked after by their nearest branch team.

TRUSTED SERVICE PARTNERS

Gold Coast · Newcastle · Perth

INTERNATIONAL SUPPORT

Our teams travel to support client sites and projects around the world.

● Accurate Industries branches ● Trusted local agents

Our Customers

Trusted by Australia's leading operators. Shown here is a selection — we work with many more across mining, quarrying, cement, recycling, grain and food production. Pre-approved and compliant at major mine and processing sites across Australia.
